## The Northeast Diesel Collaborative (NEDC)

### Who Are We?

The NEDC is a regionally coordinated initiative to reduce diesel emissions, improve public health, and promote clean diesel technology. NEDC coordinates the collective resources and expertise of several state environmental agencies, EPA regional offices, and private sector companies to address the legacy fleet of diesel-powered vehicles and equipment. The NEDC Partners meeting is the Collaborative's largest meeting and the perfect opportunity to get your brand and technology in front of this important audience. Based on previous meetings, we anticipate hosting approximately 150 attendees.
